

## PRODUCT SHEET

### EFFERVESCENTS

The popular format of effervescent tablets is designed to **dissolve in water** and therefore allow the active ingredients to enter the body in a pre-dissolved form, **facilitating faster and more efficient absorption** in the gastrointestinal tract. With their **variety of delicious fizzy flavors**, they make supplementation a pleasant

Effervescent tablets also promote hydration by encouraging you to drink a full glass of water with each dose and eliminate the need for precise measuring. They are especially preferred by **consumers with swallowing difficulties**, as well as by children. However, due to their sensitivity to moisture and fragility, effervescent tablets require proper handling and storage to ensure their quality and effectiveness. Similar to tablets, effervescent tablets are typically an **economical** dosage form to produce.

#### INFORMATION

##### Shapes

- Round standard tablets size of Ø 25mm and 4g

##### Batch Sizes

- 10.000 tubes

##### Packaging Size

- 10's tubes
- 20's tubes

##### Formulations
