

PRODUCT SHEET

LIQUIDS

Liquid food supplements remain a **popular format** choice as they are **ready to drink immediately**. They are an **uncomplicated and flavorful option** for people who don't like to swallow tablets and capsules. Unlike solid dosage forms, which need to be broken down by the digestive system before releasing nutrients, liquids start **getting absorbed almost immediately upon ingestion**. This can result in **higher bioavailability**, meaning a greater proportion of the nutrients enters the bloodstream and is utilized by the body. Furthermore, depending on the type of packaging, liquid products can convey a particularly high value to the consumer.

INFORMATION

Shapes

- Vials
- Bottles

Lead Times

- For first order 12 weeks after signatures & artwork approval
- For consecutive orders 10 weeks

Packaging Materials

- PET / rPET, available with folding box for 12/24 or more vials

Formulations

- We develop all standard formulations.
- We will be happy to advise you on more complex projects.
