

## PRODUCT SHEET

### SEMI SOLIDS

Semi-solid formulations are primarily designed for topical application in cosmetic and medical contexts. They are commonly used to deliver active ingredients to localized areas of the body, providing targeted benefits such as treatment applied to the skin, nasal mucosa, cornea, buccal tissue, ear, or urethral membrane. Semi-solids can be produced in various forms including **vaseline, ointments, creams and lotions**. **Gels** are also a common format in Sports Nutrition, offering a convenient and fast-absorbing solution for delivering nutrients.

#### INFORMATION

- For consecutive orders 10 weeks

##### Packaging Materials

- Sticks: PET
- Jars: tin | plastic (PP, PE, PET, HDPE)
- Squeeze Pouch: PET 12  $\mu$  + Alu 7  $\mu$  + PE 60  $\mu$

##### Formulations

- We develop all standard formulations.
- For more complex projects we are happy to advise you.

##### Packaging Types

- Sticks
- Jars
- Squeeze Pouch: Single dose thermo-sealed envelopes with 3 or 4 welds; w/ or w/o tear notches.

##### Packaging Sizes

- Sticks: 15ml
- Jars: 10ml to 500ml
- Squeeze Pack:  
40 - 60gr: 165 x 84cm  
70gr: 165x130cm

##### Batch Sizes

- Sticks: 20.000
- Jars: 200.000
- Squeeze Pouch: 4.900

#### PACKAGING OVERVIEW

We develop and manufacture all Vaseline-based formulations, hydroalcoholic solutions, and biocidal repellents in-house at our production facilities in Spain. In addition, our partnerships with trusted manufacturers allow us to add ointments, cremes and gels to our range of cosmetics. These partners have proven themselves over many years and are carefully qualified by us. **Our goal is to deliver all-in-one packaging and production solutions for a wide variety of product categories, all from one single source.**
